## FOREWORD

We are doing our part to stimulate business activity by passing every possible price advantage to our customers. And this is not being done at a sacrifice in quality for never were we able to offer a finer lot of bulbs. All through this Fall list you will find quotations below those we have been able to make for many years and in a large number of the items the prices are the lowest ever quoted.

We again urge our customers to turn away from some of the older varieties which have been popular in the past to the long new list of finer things which have been developed in the past few years and which are now available in sufficient quantities to justify lower prices and permit plantings on a liberal scale. Only those with the best flowers can hope to operate profitably in these times and these best flowers can only be produced by a selection of the right varieties.

We are constantly broadening our line and thus maintaining our position as the foremost suppliers of the most complete line of bulbs and kindred items in the country. We are ever on the lookout for new or old neglected bulbous items which offer commercial possibilities and these are being added to our list from time to time.

We take the opportunity of thanking you for your patronage in the past and hope that we may continue to enjoy your good will.

### BUY RYNVELD'S BULBS AND BE SURE OF QUALITY, SIZE, HEALTH GUARANTEED TO GIVE SATISFACTION

#### Terms

5% off for cash with order.

2% off for payment within 10 days.

All bills payable net 60 days.

Unless credit is established with us please give references and allow us sufficient time for checking.

All quotations herein are for shipment F.O.B. New York.

Prices slightly higher on the Pacific Coast.

For the convenience of our Southern customers we can make shipment of Florida grown stock direct from growing station at Jacksonville, Fla.

Prices quoted herein are subject in all cases to maintenance of present tariff schedule on the respective item and any change made therein before delivery automatically cancels the within quoted prices.

#### Display Cards for Your Counter Trade

To those who retail bulbs we offer free of charge display card reproductions in natural colors. It is important that you have these as they are of considerable assistance in increasing sales and obtaining new customers.

#### SERVICE

We maintain offices and warehouses at New York and California and carry a complete line of Fall bulbs in stock for our customers requirements.

Wire orders are filled the same day as received by us. All others within 48 hours of receipt. Your inquiries are welcomed and we are pleased to make suggestions as to culture or selection when requested.

We have a representative in your territory. Let us have him call on you.

#### We Guarantee

That all bulbs leave our farm or warehouse in good condition, packed in boxes sufficiently strong

and substantially secure to insure delivery in good order but we do not assume risks in transit.

That all stock is true to name as represented.

That all stock is inspected and found to be sound and free from disease when shipped.

#### We Do Not Guarantee

Productivity - The actual growing of flowers is subject to many conditions over which we exercise no control. We allow five days after delivery for inspection by the purchaser and cannot entertain complaints made after the expiration of this period. All requests for adjustments must be made in writing to our main office at 149-155 West 24th Street, New York City and we assume no liability for those made verbally to our salesmen or in any other way.

#### PRICES

Allow us to sound a word of warning to those who contemplate placing orders based upon competitive quotations. During a period of declining prices such as we have had recently, competition has developed into a frenzy of price cutting with the inevitable result that quality is sacrificed for the sake of price. Skimping on prices when purchasing bulbs invariably results in depreciated returns at blooming time.

We maintain that **quality for quality** our prices are lower than those quoted by others not interested in maintaining the high standard which we have set up.

#### SQUARE DEAL

To those who have dealt with us for years we need not repeat our policy of square dealing. To our new customers we desire to say that at all times we are anxious to adjust differences. Occasionally, mistakes occur and we receive requests for adjustments. Many are not our fault but our policy of "a square deal for the Florist" will not allow us to overlook them.

# Rynveld's Quality Bulbs

*For the Wholesale Trade*

Primarily we are Bulb growers and it is our policy and desire to actually produce to the greatest possible extent, all the Bulbs we sell. Our Bulbs are carefully selected for size and vigor and are bound to give the best results under normal growing conditions. It is reasonable to believe that we as "Growers" can regulate a more consistent supply of "Quality Stock" than it is possible to obtain if we had to depend upon other suppliers.

Read what some of the leading florists have to say about the quality stock we supplied.

## French Roman Hyacinths

There is no bulbous item that can be forced for Christmas and midwinter use that is as graceful as the Roman Hyacinth. Splendid for pans. Very useful for basket and make-up work. Can also be easily grown in the home in bowls of Rynveld's Bulb Fibre. They are not hardy in our Northern climate, and should not be planted outdoors.

	Per 100	Per 1000
12/13 ctm.	\$5.75	\$54.00
13/14 ctm.	8.00	76.00

15 ctm.	12.00	115.00
Pink	5.00	45.00
Blue	4.50	40.00

With the lower prices prevailing on Hyacinths we believe that larger quantities can be profitably used. We again remind you that our nurseries are situated in the midst of the best Hyacinth section and our increasing volume of business in this item is proof that no finer Hyacinths are produced than those we send out. We are only offering varieties proven to have the greatest merit. Not all varieties will bloom at the same time. (a) are the earliest, (d) the latest.

### *The Finest Crop We Have Ever Had!*

Each year it is becoming more and more apparent that the Bulbs we are producing in Northern Florida are the finest available in this country. This past winter we have had many prominent bulb men visit our plantation and they tell us that we have the finest example of commercial Bulb production in existence. In the many tests conducted our stock stands out in producing the greatest number of flowers and earliness of flowering.

# AMERICAN GROWN NARCISSUS

## (DAFFODILS)

The American grown Narcissus featured on these pages are produced by us on our own farms on Long Island, N. Y. As we write this catalogue the digging of the Narcissus is still in progress. We will have a beautiful lot of bulbs, but we also have a large number of advance orders which must be taken care of. Not until the bulbs are graded and counted can we determine the available quantities still to be offered. We do know however that on some of the popular forcing kinds our remaining stocks are very low, for forcers did very well with the bulbs we shipped to them last season and have ordered larger quantities as a consequence. May we suggest therefor that you place your order immediately. Late buyers will be disappointed.

Since many of the novelty varieties are limited in quantities, we are listing the leading commercial varieties only. To those who are interested in the novelties, our complete list will be mailed upon request.

# Giant Flowering Amaryllis

## Amaryllis Hybrid

A re-selected strain of the very largest flowered sorts, ranging in color from almost pure white, through various shades of pink, to the deepest scarlet, some with beautiful markings and mottled throats.

An easily-grown plant of wondrous beauty; a quick seller to those who love an unusual and attractive pot plant for the living room or sun parlor. Makes a charming and lasting cut flower.

**AMARYLLIS CULTURE** — Amaryllis bulbs are ready for delivery early in November, but we do not recommend planting them until the latter part of January when the flower buds will be showing. Plant in five or six inch pots and water sparingly until root growth develops. After flowering, the bulbs maintain active growth and about the middle of October watering must cease and the bulbs dried off by laying the pots on their sides under a greenhouse bench or in a dry cellar. Early in February the bulbs will show new flower stems and the pots should then be watered and brought into the light, a temperature of 50 degrees is best at the start, and this can be increased to 60 degrees as the flower stems develop. Applications of weak manure twice a week at this stage will strengthen the plants and increase size of flower. Slightly larger pots will be necessary as the bulbs develop size.

## Bulbous Iris

Everyone knows the value of these beautiful bulbous Irises. The flowers are not only superior in substance, brilliancy and purity of color, but also earlier and larger than the old Spanish Iris. These Irises are unsurpassed as cutflowers; they will stand any amount of handling.

Florists have found them very profitable for greenhouse forcing, bringing in good returns in the market. The bulbs we offer are produced at our Long Island farms, grown under cool weather conditions and free from the mosiac diseases.
